Rehearsal

Connect the Jaipuria Moodle Assistant

in Claude

For Jaipuria faculty and staff. In Claude you add the assistant as a custom connector, using the address below. Follow the screens in order. The whole thing takes about a minute.

Use your Jaipuria Google account
You see only the students your account is allowed to see.

It can read, not change
It cannot change anything in Moodle.

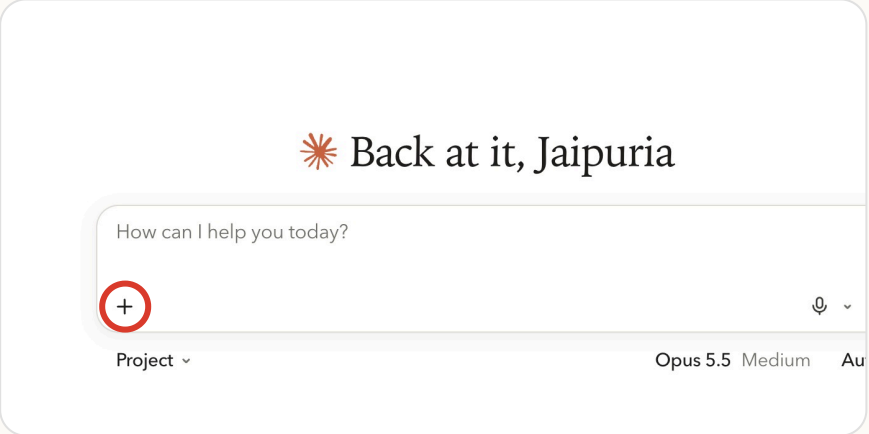
You connect once
Next time you only ask.

Address to paste in Claude

`https://rehearsal-os.app/moodle-assistant/mcp`

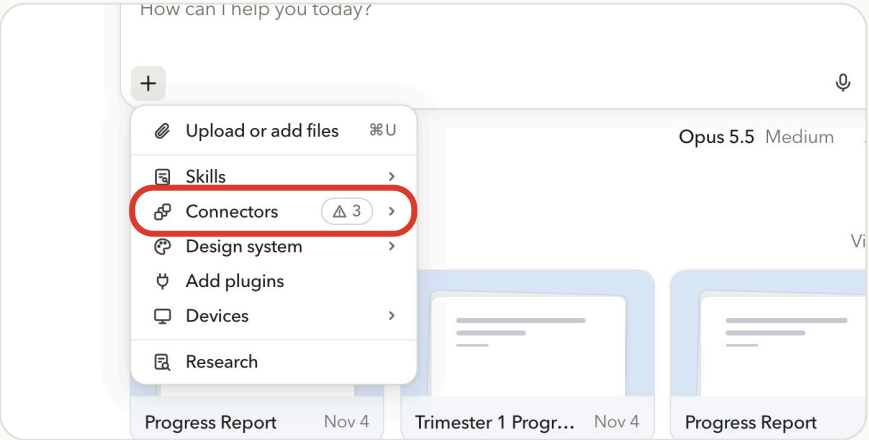
1 Click the plus

Open Claude. On the home page, click the plus at the bottom left of the chat box.



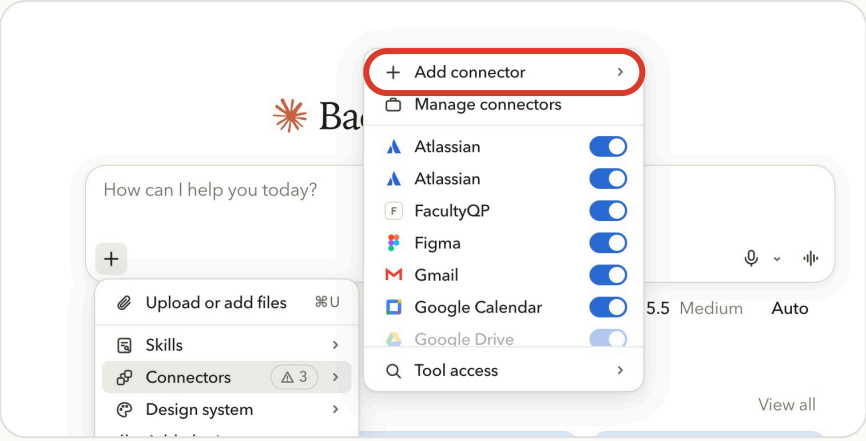
2 Go to Connectors

A menu opens. Move to Connectors.



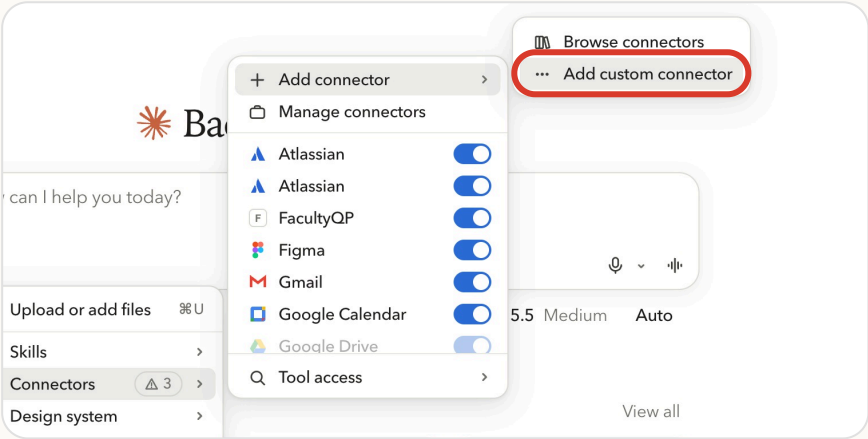
3 Open Add connector

A second menu opens beside it. At its top, move to Add connector.



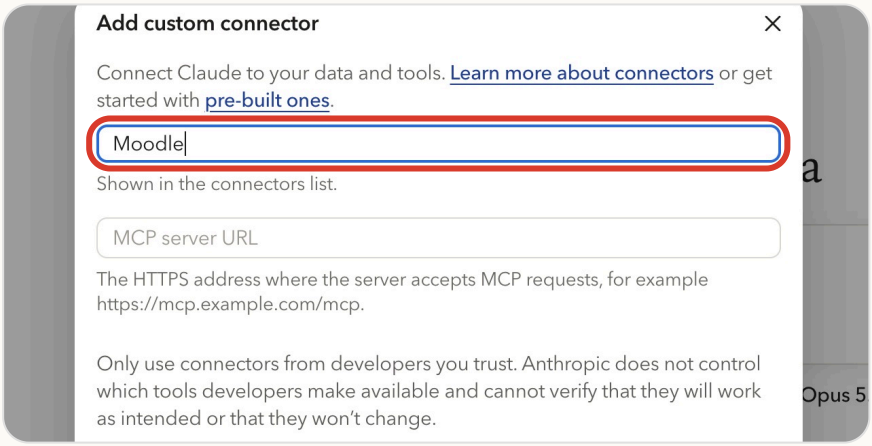
4 Add custom connector

A third small menu opens. Click Add custom connector.



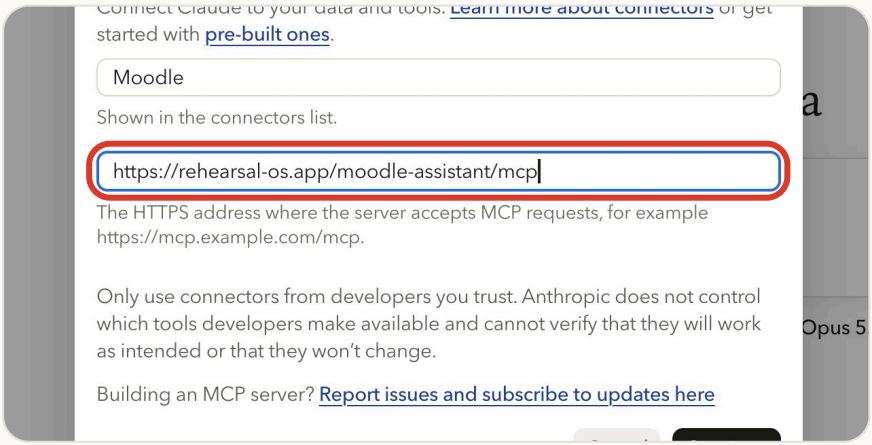
5 Type a name

The Add custom connector window opens. In Name, type Moodle. Any name works; this is what you will see in your list.



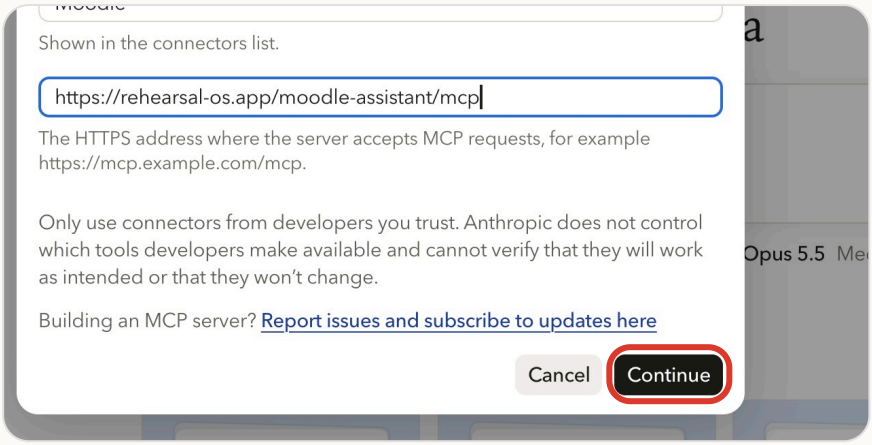
6 Paste the address

Click MCP server URL and paste the address given at the top of this guide.



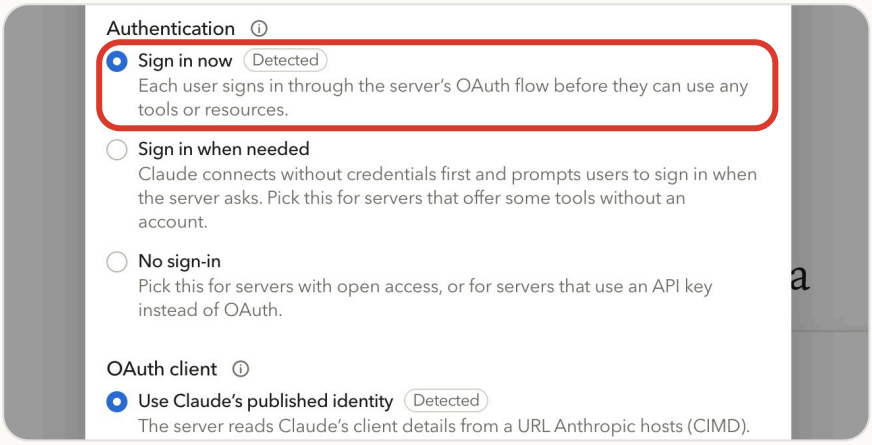
7 Click Continue

The Continue button turns black once both boxes are filled. Click it.



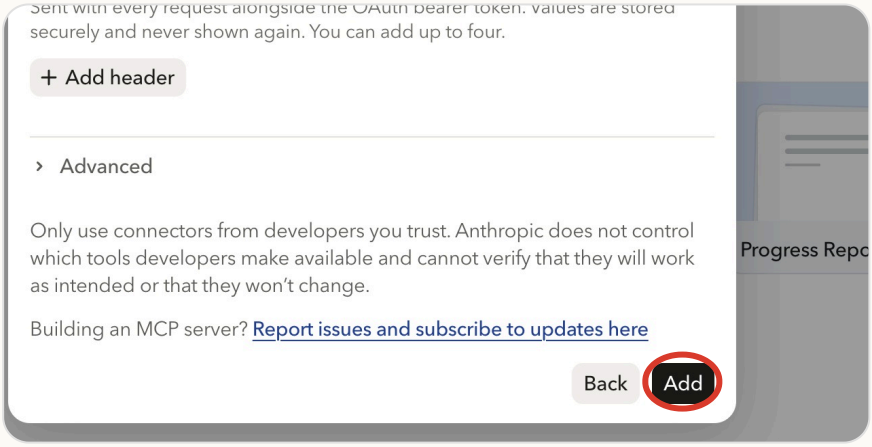
8 Leave the settings

Sign in now and Use Claude's published identity are already selected. Do not change anything here.



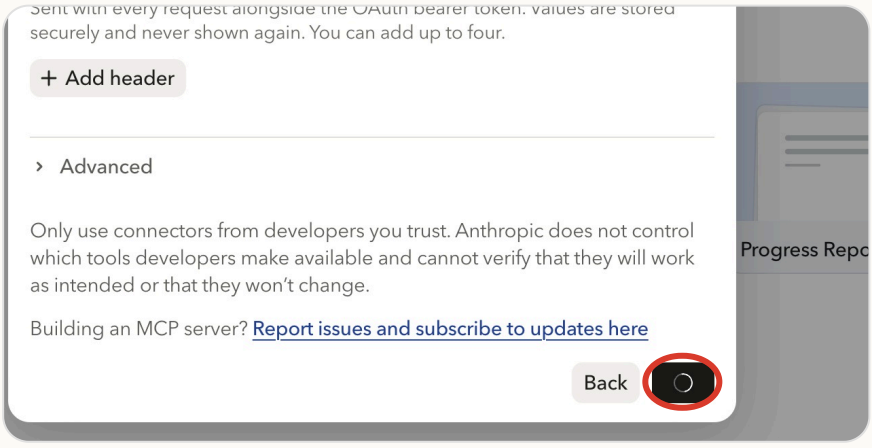
9 Scroll down, click Add

Scroll to the bottom of the window and click the black Add button.



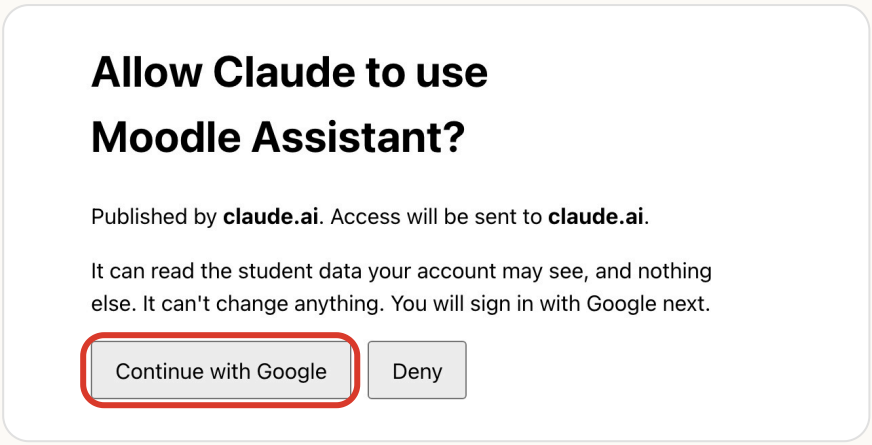
10 Wait while it connects

The button shows a small spinner. This can take up to a minute. Do not close the window.



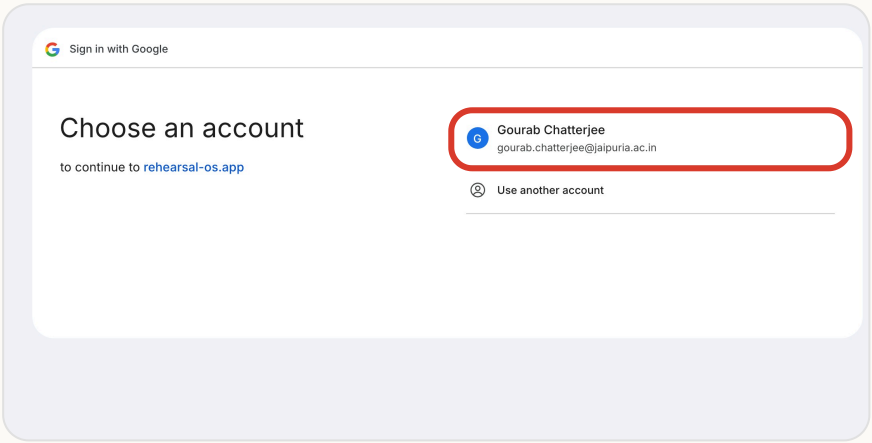
11 Continue with Google

A page asks to allow Claude to use the Moodle Assistant. It can read, not change. Click Continue with Google.



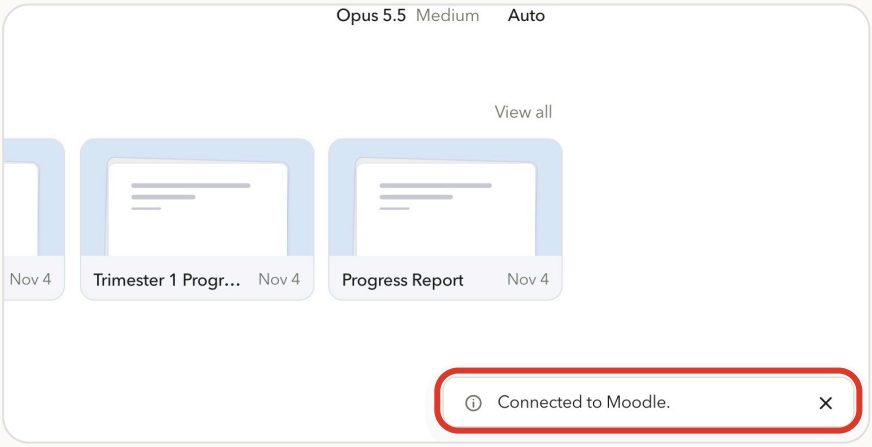
12 Pick your account

Google shows Choose an account. Click your official Jaipuria account.



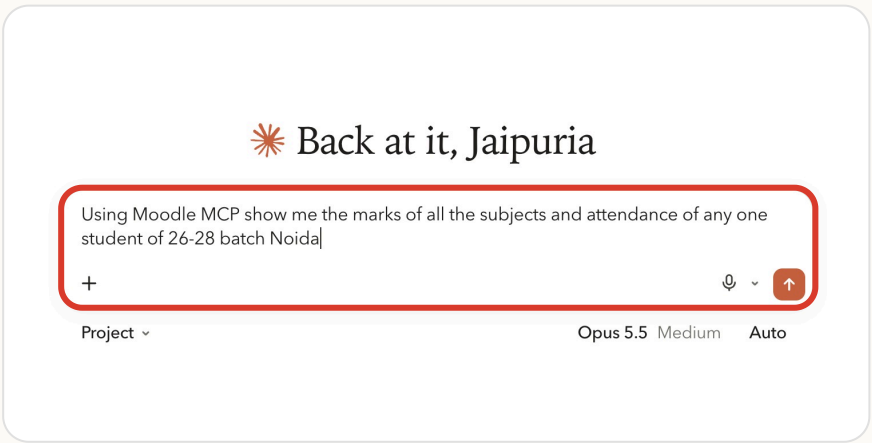
13 Connected to Moodle

You return to Claude. A small note at the bottom right says Connected to Moodle.



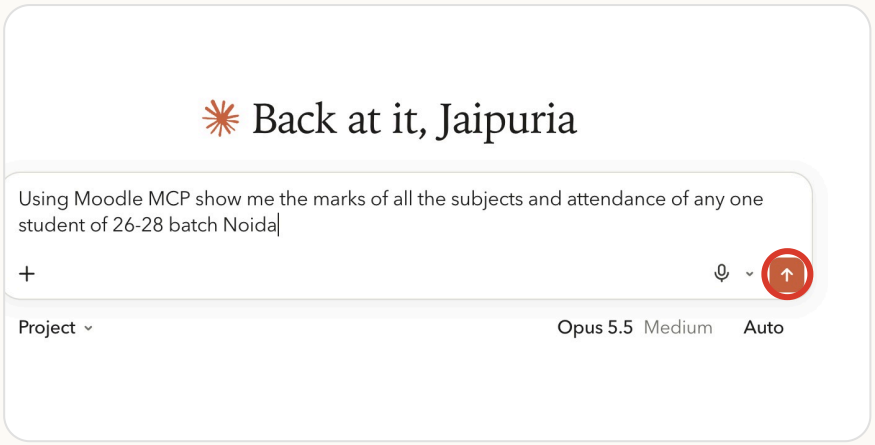
14 Type your question

Click the chat box. Start with Using Moodle so Claude knows where to look, then ask in plain words.



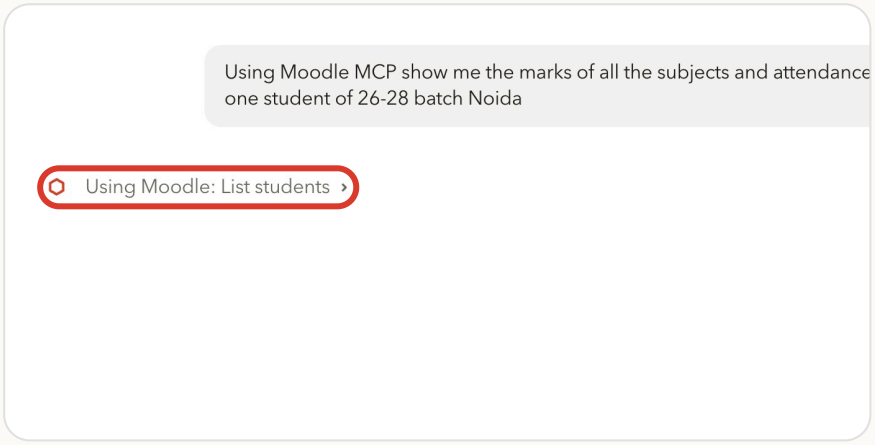
15 Send it

Click the arrow at the bottom right of the box.



16 Wait a few seconds

Claude shows Using Moodle: List students, then Student record, while it reads the data. Wait a few seconds.



What you get back

- The student's name, enrolment number and sections, and the date of the Moodle data.
- The cumulative CGPA after Term 1 and the rank in the batch.
- A Term 1 table with CE, end-term, combined marks, grade and attendance for each subject.
- A Term 2 table with attendance for each subject, when Term 2 marks are not entered yet.

A first question to try

Using Moodle MCP show me the marks of all the subjects and attendance of one student of the 26-28 batch Noida
