Rehearsal

Connect the Jaipuria Moodle Assistant

in Rehearsal OS

For Jaipuria faculty and staff. The assistant is already listed inside Rehearsal OS, so there is no address to paste. Follow the screens below in order. The whole thing takes about a minute.

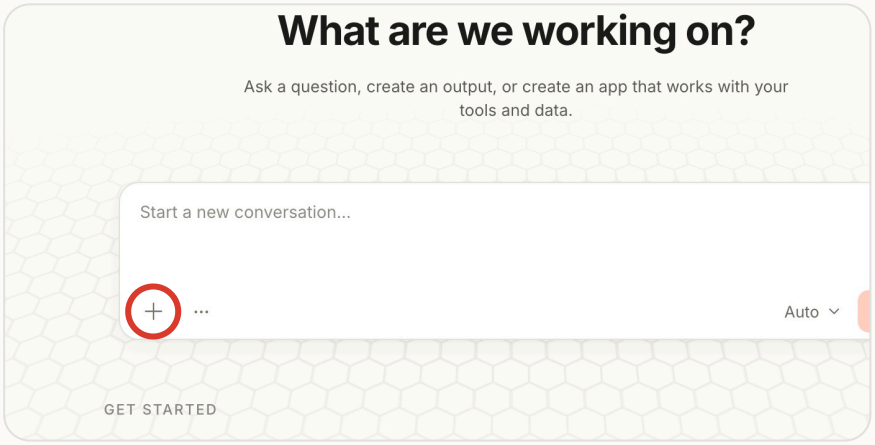
Use your Jaipuria Google account
You see only the students your account is allowed to see.

It can read, not change
It cannot change anything in Moodle.

You connect once
Next time you only ask.

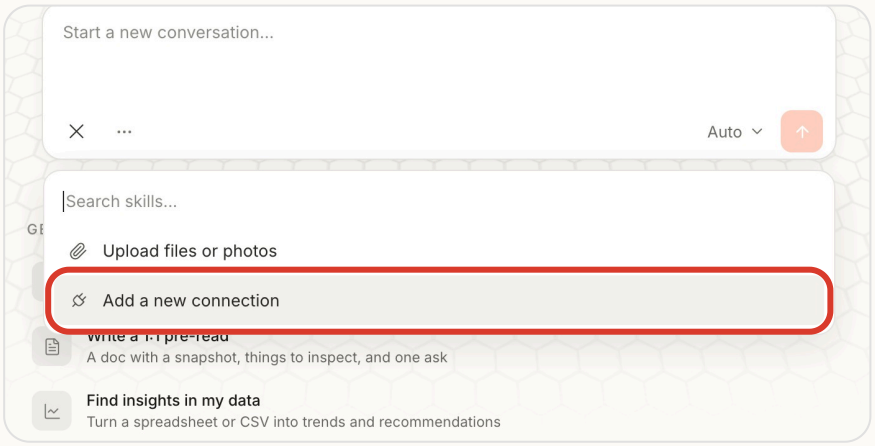
1 Click the plus

Open Rehearsal OS. On the home page, click the plus at the bottom left of the box.



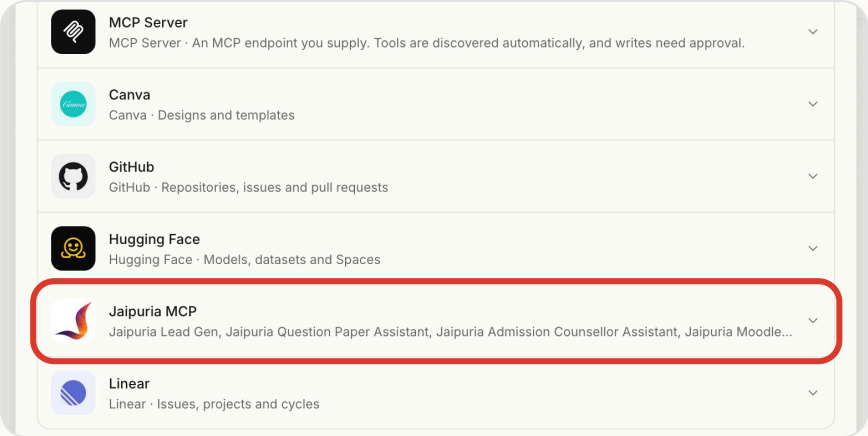
2 Add a new connection

A small menu opens under the box. Click Add a new connection.



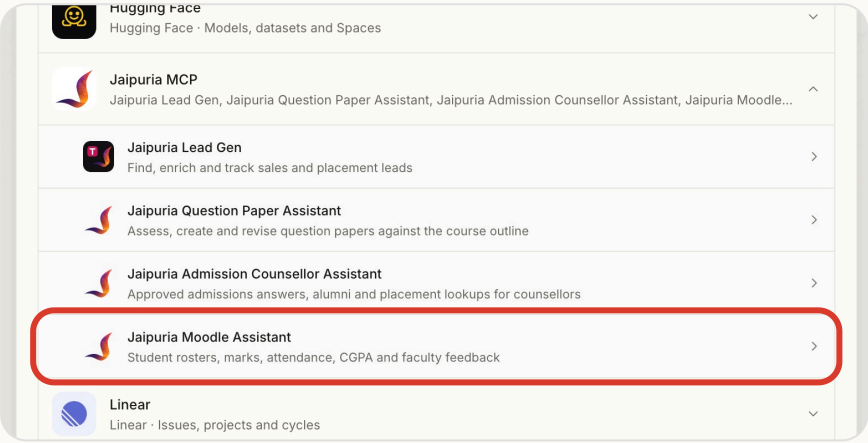
3 Find Jaipuria MCP

The Create New Connection window opens. Scroll down the list and click Jaipuria MCP.



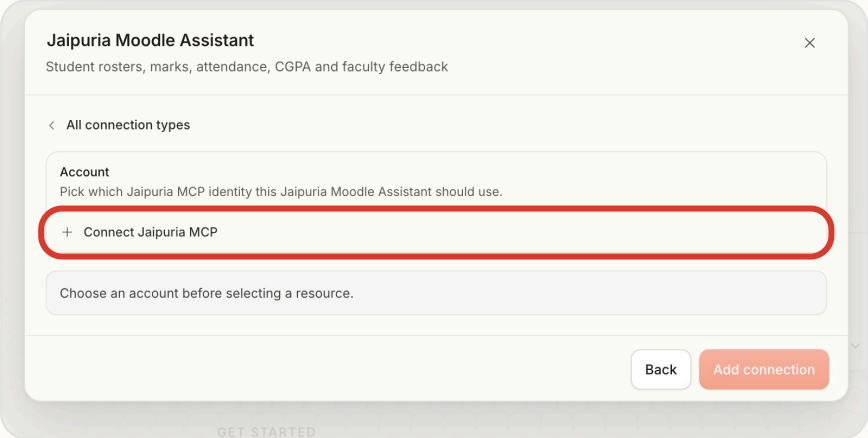
4 Pick the Moodle Assistant

Four assistants appear under Jaipuria MCP. Click Jaipuria Moodle Assistant, the last one.



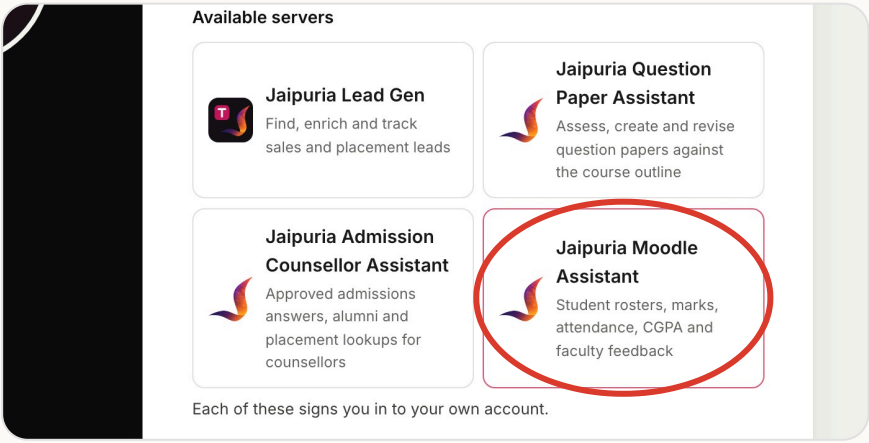
5 Connect Jaipuria MCP

The next window asks for an account. Click Connect Jaipuria MCP. A new tab opens.



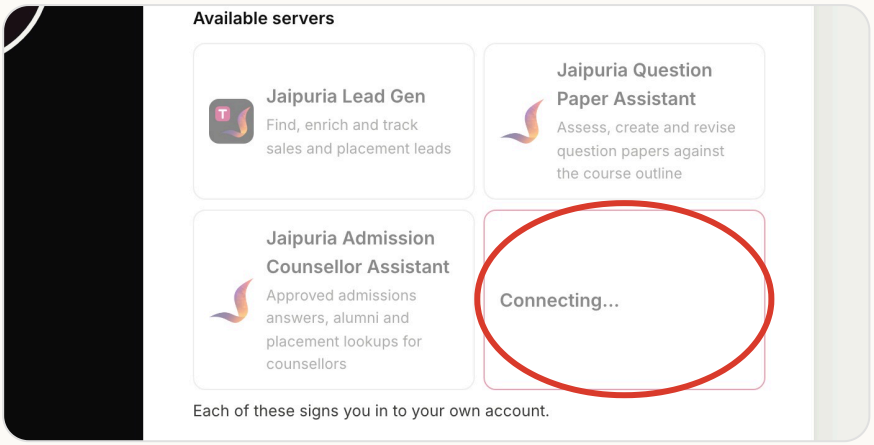
6 Choose it again

In the new tab, under Available servers, click the Jaipuria Moodle Assistant card.



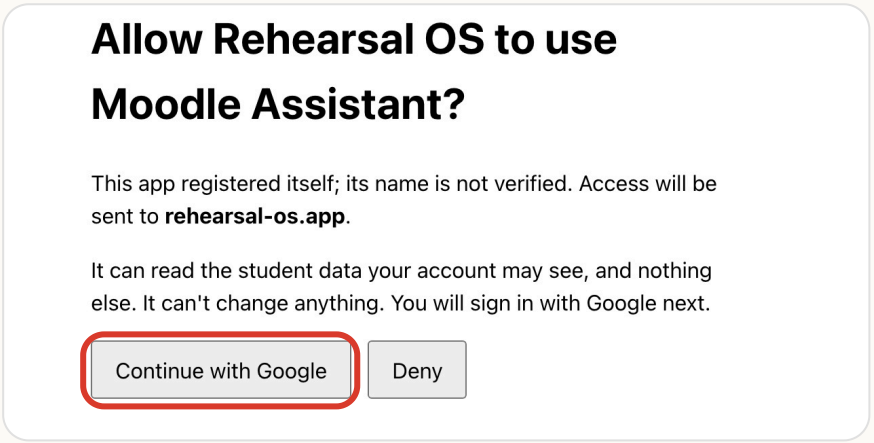
7 Wait for Connecting

The card changes to Connecting. Wait a moment. Do not close the tab.



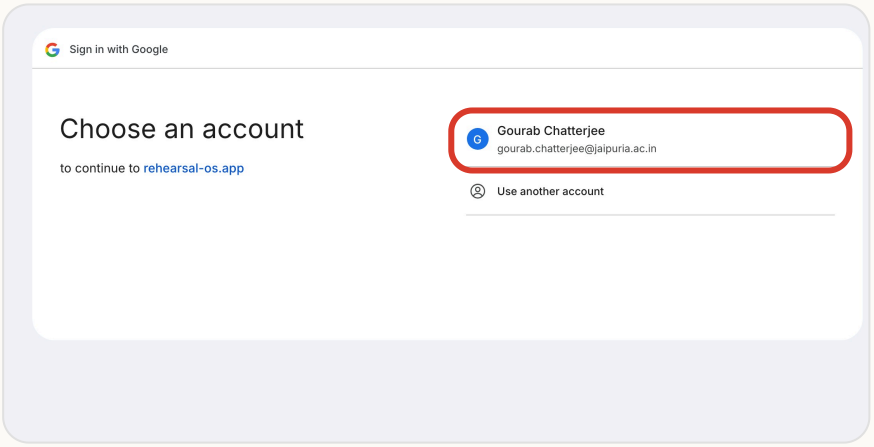
8 Continue with Google

A page asks to allow Rehearsal OS to use the Moodle Assistant. It can read, not change. Click Continue with Google.



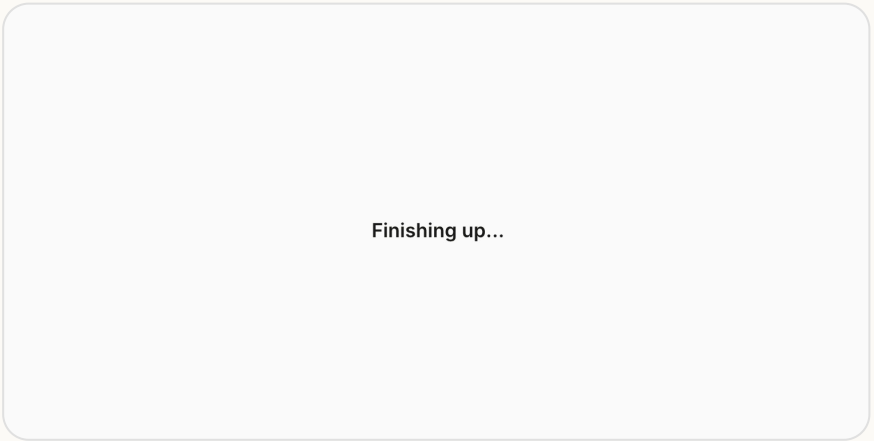
9 Pick your account

Google shows Choose an account. Click your official Jaipuria account.



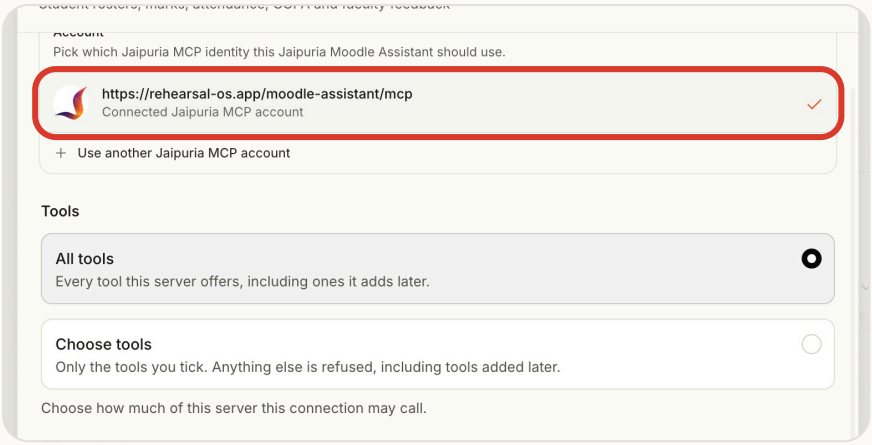
10 Wait for Finishing up

You will see Finishing up. The tab then returns to Rehearsal OS on its own.



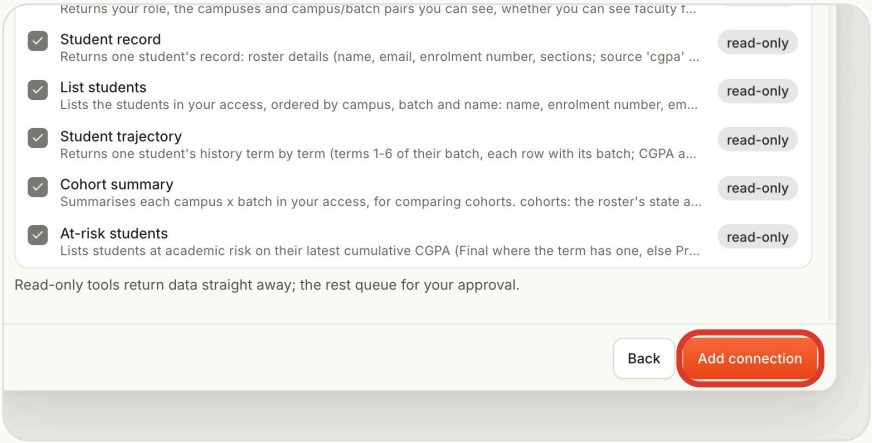
11 Check the orange tick

Back in Rehearsal OS, the account row has an orange tick. All tools is selected, and all 15 tools are read-only.



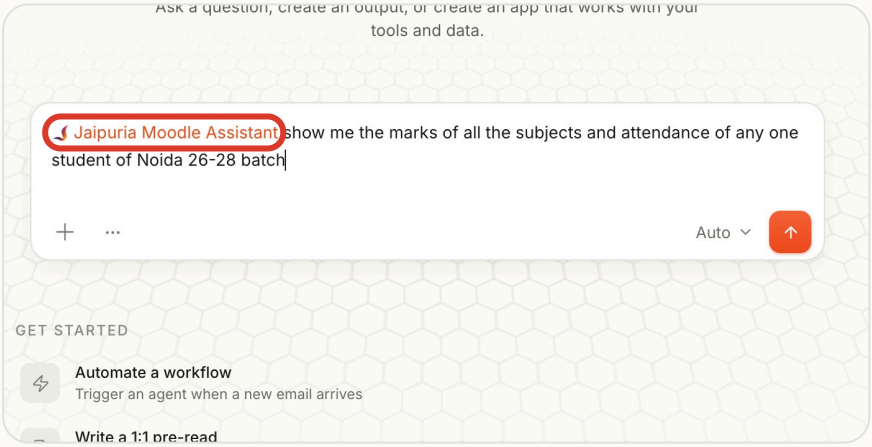
12 Click Add connection

Leave it on All tools. Scroll down inside the window and click the orange Add connection button.



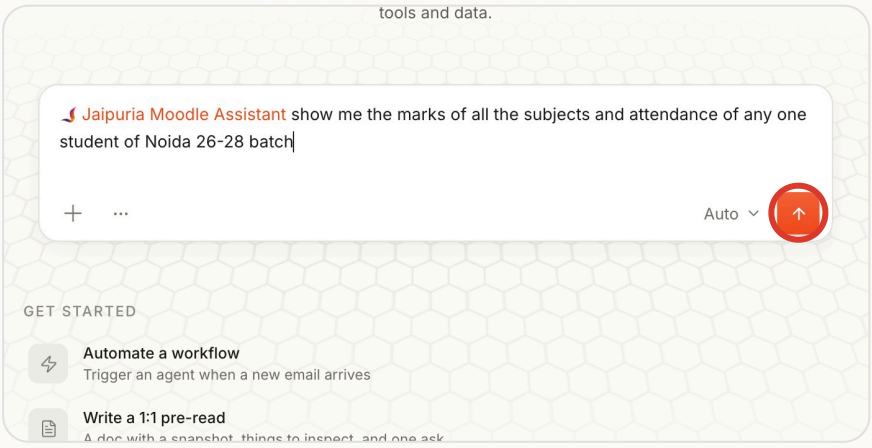
13 See the orange tag

The window closes. An orange Jaipuria Moodle Assistant tag now sits in the box. Type your question after it.



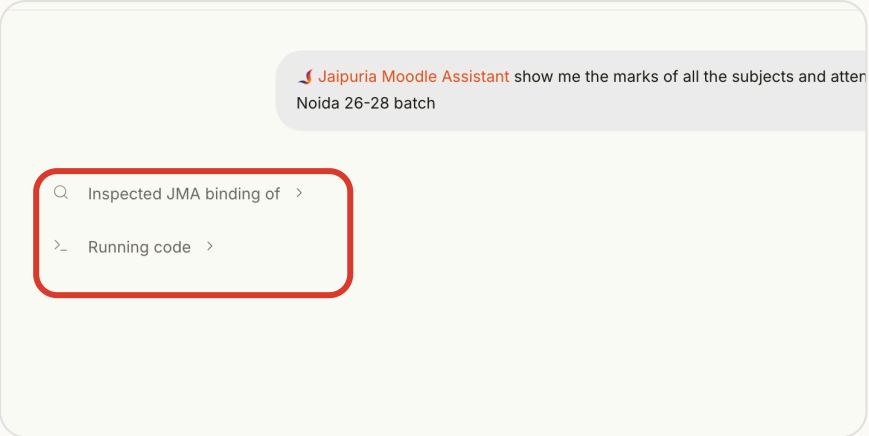
14 Send your question

Write in plain words, then click the orange arrow at the bottom right of the box.



15 Wait a few seconds

Rehearsal OS shows Thinking, then lines such as Running code, while it reads Moodle.



What you get back

- The student's name and enrolment number, and the Term 1 CGPA.
- A Term 1 table with CE marks, end-term marks and attendance for each subject.
- A Term 2 table with attendance for each subject, when Term 2 marks are not entered yet.
- Short notes at the end: the date of the data, and anything Moodle does not hold, written in words.

A first question to try

Show me the marks of all the subjects and attendance of one student of the Noida 26-28 batch

Prefer to watch? The one-minute video is at youtu.be/EtvLqBba_gY. This guide is also online at tryrehearsal.ai/rehearsal-mcp/moodle-assistant.
